

Compass Pro

adjustable mobile stand for iPad

Compass Pro is your new solution to iPad optimization.

You use your iPad in many different ways, so why settle for a stand that only displays iPad at one angle? The radically redesigned Compass Pro is a versatile little folding stand that holds your iPad at three different angles – both vertically and horizontally. Use Compass Pro as a hands-free display stand, an active desktop stand for interacting with iPad, or as a typing/sketching wedge. This solid steel stand has soft silicone in the right places. It's strong, stable, and folds flat to go wherever your iPad roams. Compass Pro works with all models of iPad and iPad Pro.

Why use Compass Pro:

- Holds iPad horizontally or vertically at three different heights for hands-free or hands-on use
- Works as an active desktop stand for touching and swiping
- Low-angle, wrist-friendly typing and sketching angle
- Folds compact for travel and stores inside included pouch
