zioxi M1 Computer Desks

From table to IT desk in an instant

The **zioxi** range of pop-up computer desks give great flexibility to any space - simply push down and the computer screen, keyboard and mouse rise up gracefully, instantly converting a standard desk or table into an IT workspace with lots of room in front of the screen.

Key features:

- Rising top design for single or double display screens of any width.
- Display height and tilt adjustment as standard
- Suitable for TFT monitors and All-in-One PCs (please let us know your IT specs when ordering)
- There's also the option of a sliding top - particularly useful for accommodating very large widescreen monitors
- Cleverly designed tray for storing the keyboard , mouse and other items eg. a Raspberry PI, when not in use
- A very wide range of standard shapes and sizes including single, double & triple desks; benching desking with upto 6 PC stations, circular tables, collaborative tables with integrated shared displays and even tables shaped like lollipops. And there's always the option of using our modular components to design a bespoke solution to exactly meet your needs—please just ask.
- Wide range of available table top & leg colours and finishes with a hard wearing laminate top surface
- Extensively & successfully used in University, School, MOD, Public sector & Commercial environments
- Metal leg or panel end options
- A choice of CPU hangers & security enclosures for PCs
- Optional security lock for displays
- A range of different desktop power & data options
